

2017 BSA National Jamboree

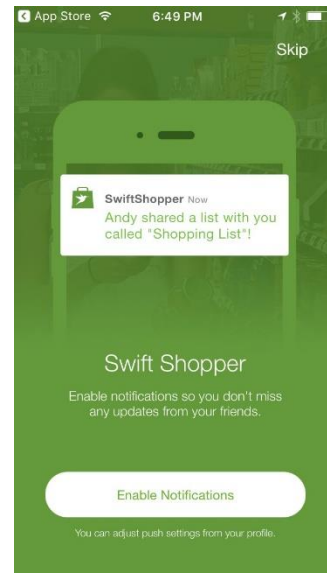

Scout Registration

Download and Install the Application

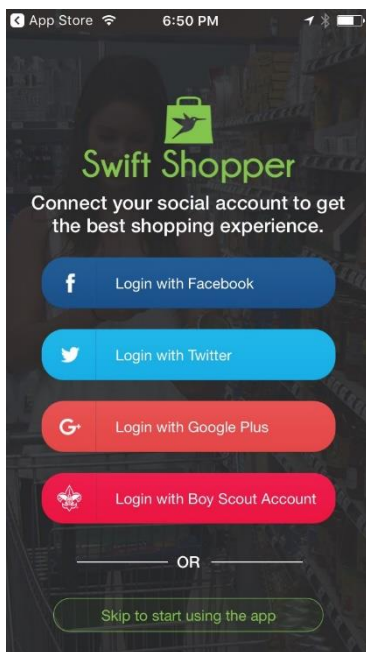

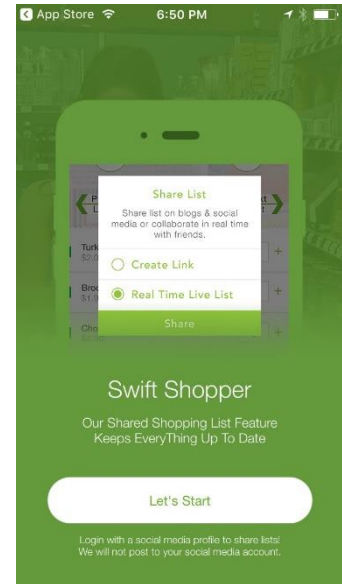

1. Download the Swift Shopper application from the Google Play Store (for Android Phones) or the Apple Store (for IOS phones).

2. When you first open the application it will prompt you to enable notifications. As we plan to use built in messaging to announce daily deals on food items we recommend you enable notifications

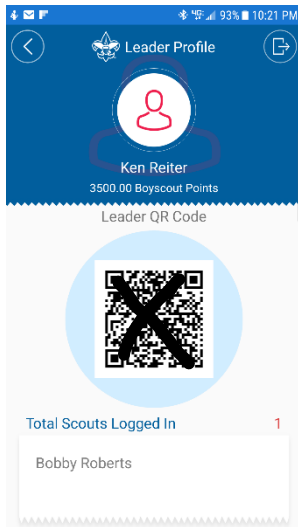

- The Swift Shopper application supports real time list sharing which will be used within a unit to allow the scouts collaborate on creating a shopping list.

- The application gives you 4 ways to login. Select the Boy Scout Login selection.

- Click on the button to login as a scout.

6. To login as a scout you need to scan a QR code provided to you by your food coordinator. Once you scan the QR code it will ask for your name. Please type your first and last name. That is all that's required for a scout to register.

7. Congratulations you are now in Swift Shopper.

For information on how to use Swift Shopper download the Swift Shopper User Guide from the Jamboree Food Team Site: <http://jamboreefoodteam.org/grocery-store-info-for-units/>
